

QRFSD1

Quad Channel Radio Signal Distribution

Functions & Features

- Independent RF input/output channels:
 - ✓ AM/FM/DAB: dummy antenna option
 - ✓ TV/GNSS/SDARS
- RF signal distribution and output level regulation
- 60dB step attenuator @1dB steps for each channel
- Programmable bias loading: 0 - 500 mA
- Bias loading voltage and current readback (0.1% accuracy)
- Boost feature
- Overvoltage and overcurrent protection
- Gigabit Ethernet control interface with PoE
- Quad-XM size: 4x single Flexmedia XM module slots
